

Danny Alexander,

I wanted to start this letter off by giving a perfect situation of why, PRIMROSE #327 Armor Plate with Moly-D is the perfect grease for my use. About 5 years ago we were doing a job offshore spotting acid with Coil Tubing and our down hole tools. After a successful job, we broke down the tool for inspection and to my surprise the PRIMROSE grease was still in the tools! Typically after spotting acid you have to deal with pitted and corroded parts. The grease wasn't in the best shape but in the end had protected our tools from damage. There are many situations that I could go on and on about, but that is the one that sticks out the most. To sum it all up, Thank you PRIMROSE for making quality grease that is versatile in many ways!

Sincerely,

Clinton Brice
