David Head Mechanic @ ELT-LLC

I started using Primrose products in our fleet and have noticed a significant improvement in our fuel economy with the use of the Power Klenz 5007 and also the Injector Perfector 406. We've also switched over to Primrose gear lube which is proving to be a true benefit for our company. Before the switch, I was replacing wheel seal and pinon seal every 3 to 4 months. Since converting to Primrose, it's been over a year since my last pinon seal replacement. Using these products have been great for us.

Thanks, Ray

David
