Jim Taylor,

Since we have been using Armor Plate grease from Primrose we have experienced marvelous results. We take our preventive maintenance very seriously. In the past 13 plus years we have used this product we have never had a king pin failure. We use it exclusively in all our equipment in all applications. We have had great success with Armor Plate and are able to cut our grease consumption by more than 50%.

Something else I need to bring to your attention is your Winter Power fuel treatment I use religiously year round. Our International dealer has stated how clean and efficient our fuel systems are on all our trucks. The power boost and emulsifying ability is beyond compare. It was noted by my dealer the one truck which is a 2008 model has had some passive re-gens but no major re-gens in three years. Although not as remarkable I experience the same kind of success in over 15 pieces of equipment.

I would highly recommend these two products to anybody running any kind of diesel trucks and specifically to International, Navistar engines.

Although these products are not the cheapest, they seem to be the best and well worth every dollar spent. I am able to save money and keep my equipment out of the shop and on the road.

Sincerely,

Steve Smith
