To whom it may concern,

M W Rentals & Services rents heavy equipment to contractors, oilfield, etc. We currently use the Armor Plate with Moly-D 327 Grease. The performance of this grease has not only outlasted our previous grease greatly, but has also saved our equipment from excessive damage or wear and tear when we have not been able to service the equipment as often as needed. The problems we were having before are the grease would harden up causing frequent need for reapplying. Another issue we had with our previous grease was water washing. Any time it would rain the equipment is usually exposed. Since switching to Primrose we haven't had to worry about the weather conditions because the heat, cold, or water does not affect its performance. We highly recommend the Armor Plate with Moly-D to anyone needing a great quality grease or anyone that's having performance issues with their current grease.

Thank you,
